

Gerald R. Ford (CVN 78) Builder's Sea Trials Highlights Video
April 8-14, 2017

MUSIC

CRYSTAL BOYD
ELECTRICAL ENGINEER

Being the first of a class, it's really exciting to be a part of it and just to see what is going to happen and I hope we have good trials.

AMONDO HALL
TEST ELECTRICIAN

It's overwhelming, you come out here and help the navy with a brand new ship, a different class, something new, the first one. I got to work on it, it's like your child, it's born, now it's here and you want to make sure it's off, make sure it's right.

JOHN NESBITT
SHIPFITTER

I guess the fact that i have never even been on a cruise before, just to see something this massive just move through the ocean, it was just an amazing sight.

YREX NIEBUONRIT
SHIPFITTER

There's a lot of hands and a lot of crafts going into this machine and just be thankful when you see it going by, thank anybody that had any involvement with it.

DEREK BRIGGS
FOREMAN

Sea trials are important for us, since i have been on the boat since 2009 to see every little piece that we installed then lead up to what their final mission is.
