

Why I&D?

About Face

Rethink what you think.

“I work on the 1050 crane. The reason why everyone knows me is because I’m seven feet tall. I guess I’m the giant in the shipyard. When it comes to hooking up jobs, I’m the first one they call. I respect the shipyard for talking about diversity and inclusion. It makes people feel more comfortable and makes other people look at people differently and respect them more. We’re all here to get a job done. You’re human just like I’m human. I think when you have different groups of people that come from different areas in life, they give you a different take on things.”

Tremayne Bunch

 Inclusion +
Diversity
